

Dwain Alexander Vaughns, II  
Fine Art Photographer

A picture becomes a photograph when you give it a soul  
-DAVii

Through my photographs I share my personal stories, while highlighting the beautiful details in the natural world often unseen. I find purpose in my work by creating awareness of our surroundings, harnessing the healing power of nature, and being a voice for those with accessibility needs. With my camera I heal myself. Through my photographs, with grace and gratitude, I pass that healing energy to you.

Since beginning my professional photographing career (2022) I have continued to grow and further hone my craft. I have been selected for numerous group exhibitions, awards, and multiple solo exhibitions. Currently I have began incorporating other visual art techniques into my photography including, sculpting, and textile work.
